e.g. "query our db looking for divergence in bin oi/pfr/lsr coins to byb and okx oi/pfr/lsr. In others words major tokens lagging a swift move on bin first."

[dialog AI] it appears a recent trend in pfr_chg_5m >2.13 + oi_chg_10m < 0.601 + BTC_chg_1m < 0.45 = Longs for meme

Setup ALGO

[dialog AI] eminent liquidation risks in many top symbols + lsr_chg_1m < 0.99 + MT chg_1m < 0.15 = wick catching limit orders
